  - Portal (phase 1)
  - ARM (phase 2)

Multifactor authentication is enforced for all users in the directory Default Directory.

Multifactor authentication (MFA) is required for all users signing into Azure portal, Entra admin center, Intune admin center and M365 Admin center. Detail can be viewed at aka.ms/mfaforazure

As an administrator, the furthest date you could have postponed to was September 30, 2025 UTC.

All users in your tenant are now required to use MFA to sign into the preceding portals. Users that have not set up MFA when the enforcement began will be redirected to set up MFA in order to log in. There will be no effect for users that already sign in using MFA.

Directory	Default Directory (93faf9d3-5b36-45fe-9712-acc9230d5c27)
Enforcement status	Enforced
