- Verify the table using the SQL Endpoint

The screenshot displays the Microsoft Fabric SQL endpoint interface. The top navigation bar includes 'Home', 'Security', 'Management', and 'Help'. The left sidebar shows the 'Explorer' pane with a tree view of the 'rajanlakehouse' workspace, including schemas, tables, views, functions, and queries. The main pane shows a SQL query: `SELECT * FROM activity_logs;`. Below the query, the 'Results' tab is active, displaying a table with 15 rows and 4 columns: 'Timestamp', 'UserId', 'Eventtype', and 'Status'. The status of each row is 'Success'.
