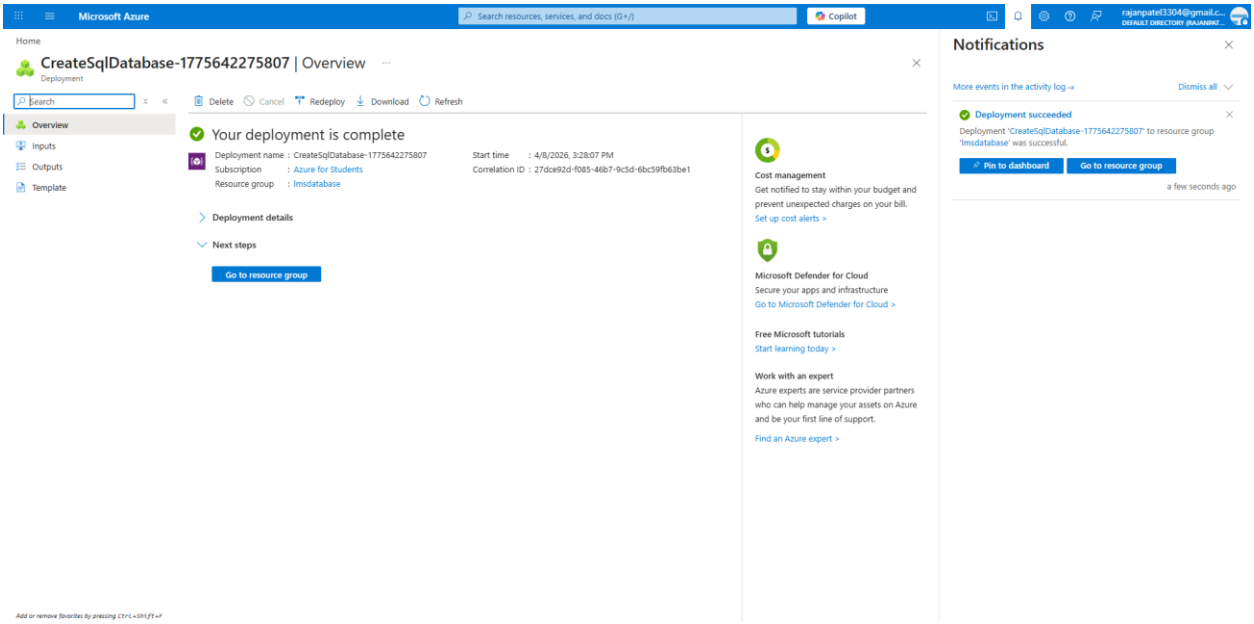
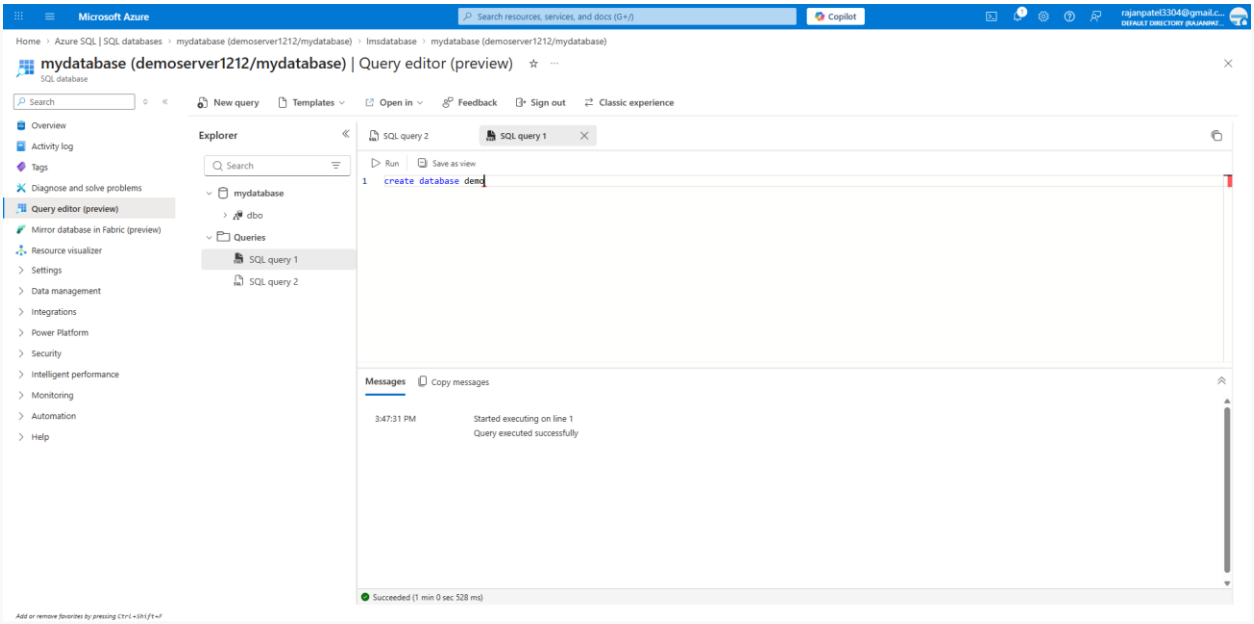
Database Assignment

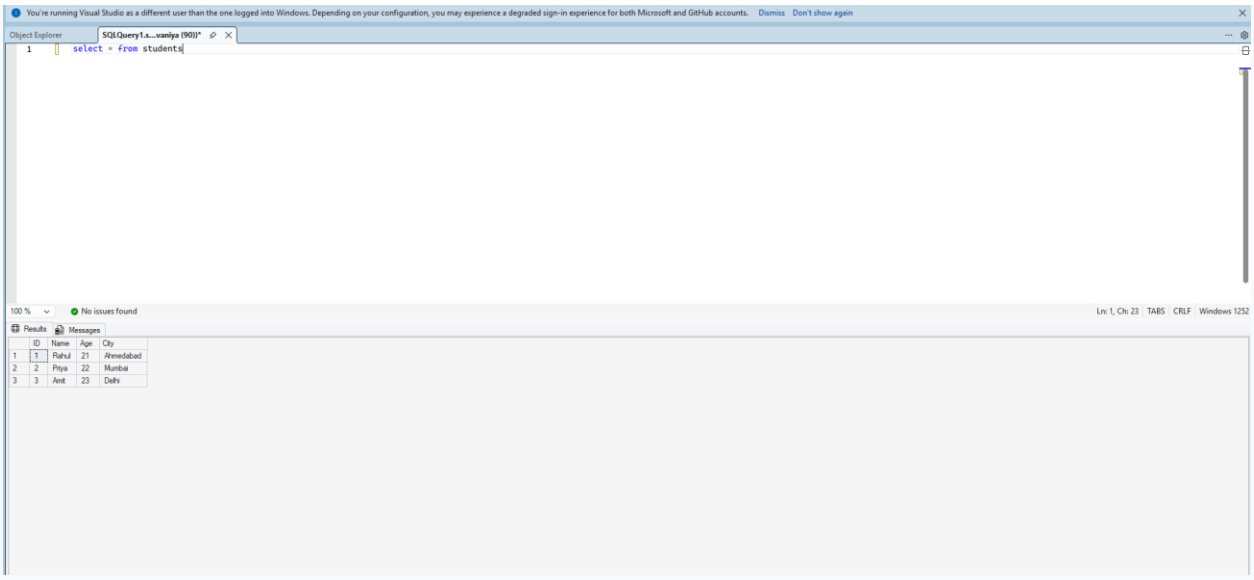
1. Setting Up an Azure SQL Database



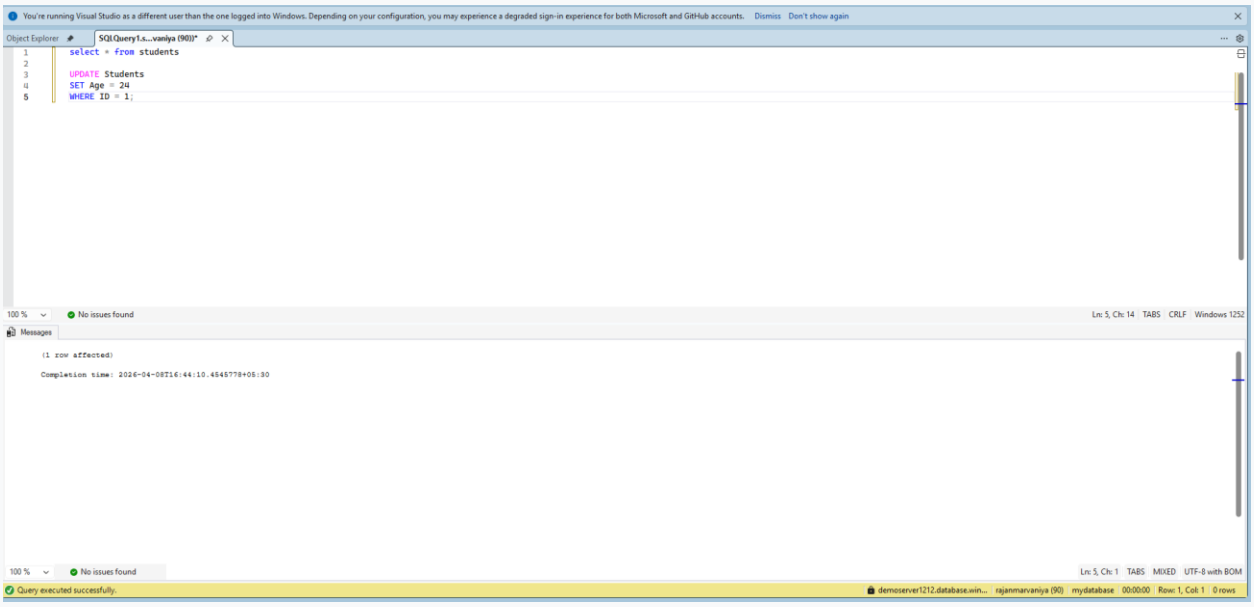
2. Connect to the newly created Azure SQL Database using SQL Server Management Studio (SSMS)



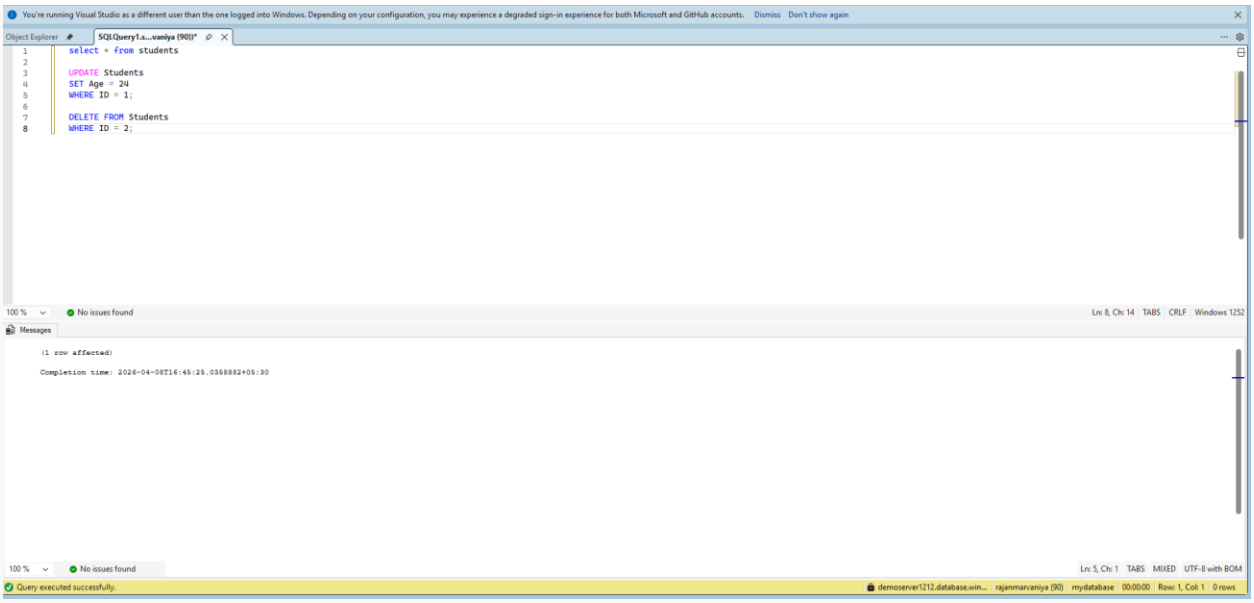
Create table



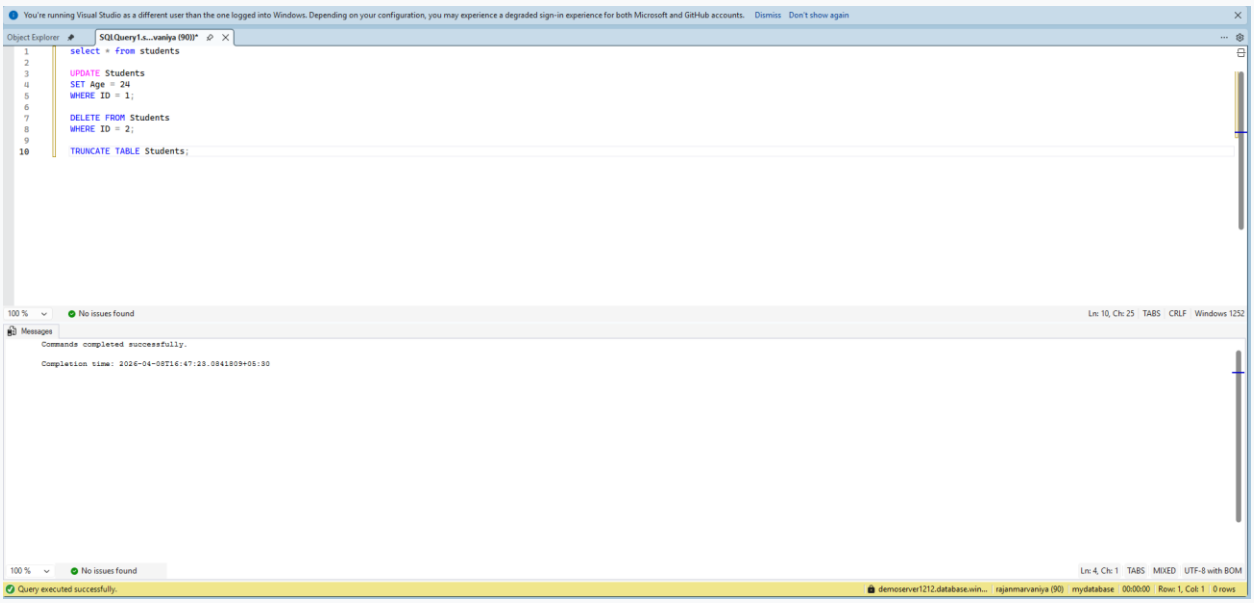
Update table



Delete row



truncate table



Drop table

You're running Visual Studio as a different user than the one logged into Windows. Depending on your configuration, you may experience a degraded sign-in experience for both Microsoft and GitHub accounts. Dismiss Don't show again

Object Explorer | SQLQuery1.s...vaniya (90))*

```sql
select * from students

UPDATE Students
SET Age = 24
WHERE ID = 1;

DELETE FROM Students
WHERE ID = 2;

TRUNCATE TABLE Students;

DROP TABLE Students;
```

100 % | No issues found | Ln: 12, Ch: 21 | TABS | CRLF | Windows 125

Messages

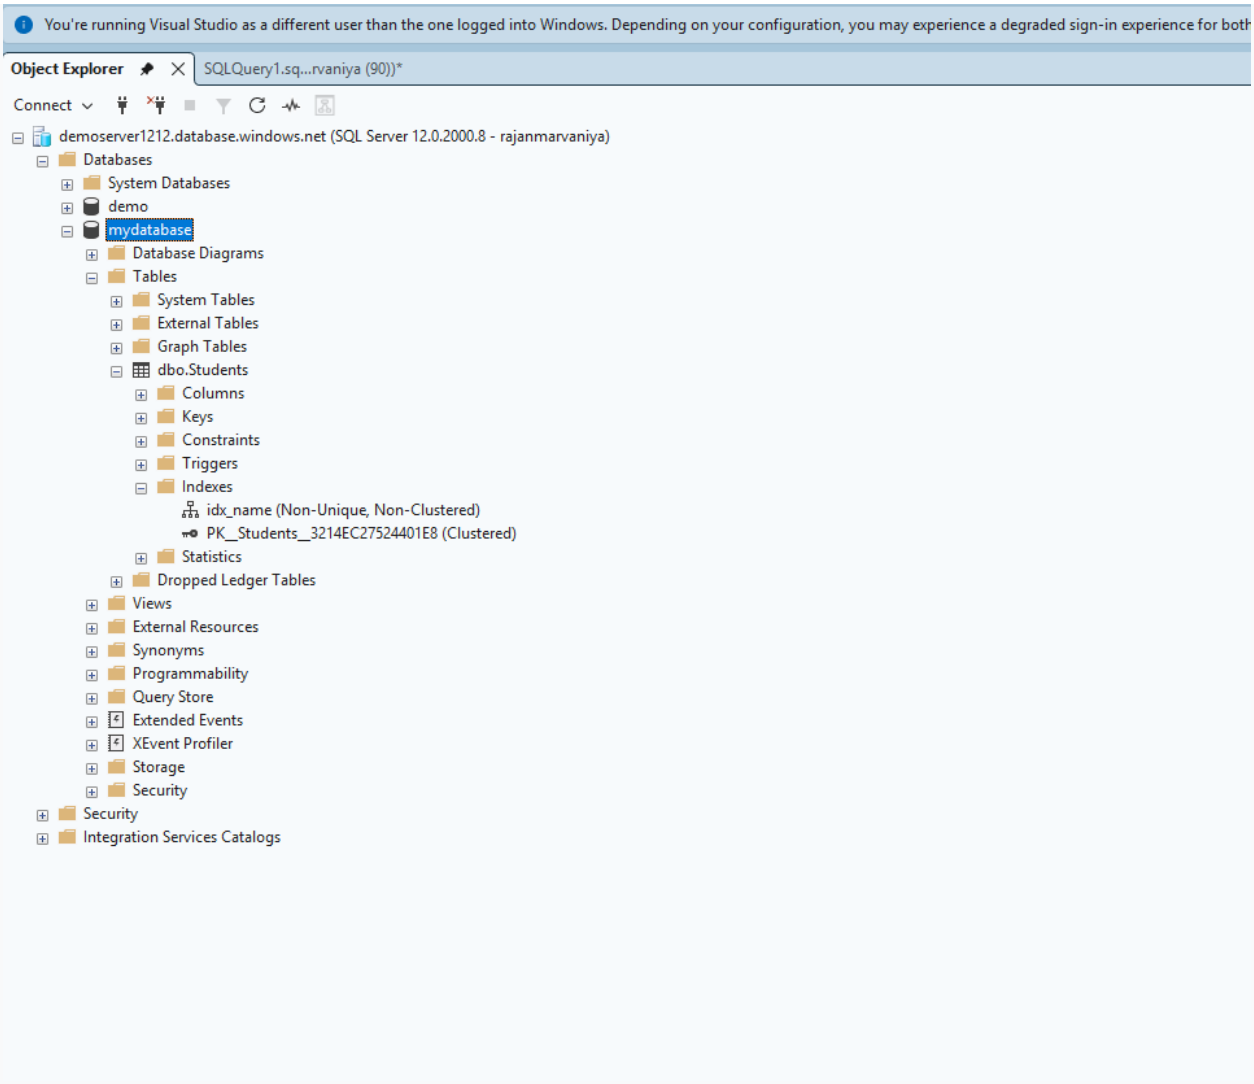
```
Commands completed successfully.

Completion time: 2026-04-08T16:52:04.8594157+05:30
```

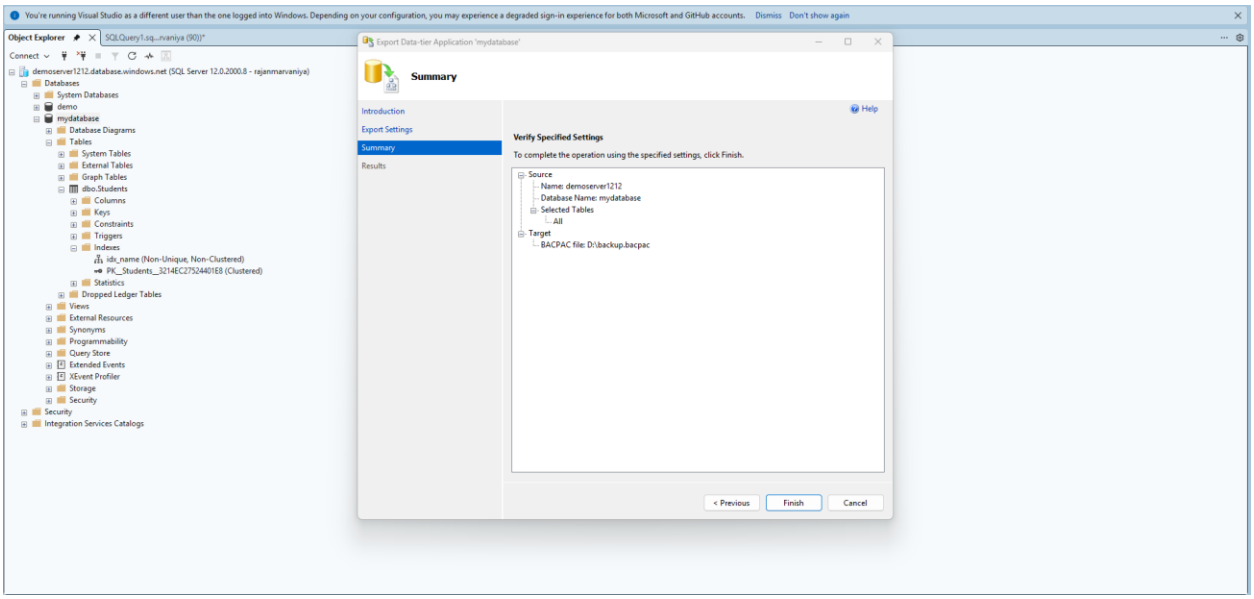
100 % | No issues found | Ln: 4, Ch: 1 | TABS | MIXED | UTF-8 with BOM

Query executed successfully. | demoserver1212.database.win... | rajanmarvaniya (90) | mydatabase | 00:00:00 | Row: 1, Col: 1 | 0 rows

3. Create an index on a table to improve query performance



4. Use SQL Server Management Studio (SSMS) to export data from your database to a .bacpac file.



You're running Visual Studio as a different user than the one logged into Windows. Depending on your configuration, you may experience a degraded sign-in experience for both Microsoft and GitHub accounts.
