

Implement text transformations

Duplicate the email address column and name it “Domain Name”

The screenshot displays a data transformation tool interface. On the left, a list of email addresses is shown, with the first row highlighted. The header of this list is 'Domain Name'. On the right, a sidebar titled 'AdventureWorks Custom...' contains a section 'Applied steps'. This section lists several transformations: 'Source', 'Promoted ...', 'Changed c...', 'Duplicated...', and 'Renamed c...'. The 'Renamed c...' step is currently selected, indicated by a red bar on its right side.

Domain Name
