

a) Logical Function

Create a calculated column in the Customer Lookup table named Customer Priority:

- If the customer is a parent and has an annual income > \$100,000, Custom Priority = Priority
- Otherwise, Customer Priority = Standard

```
1 Customer Priority =  
2 IF(  
3     'AdventureWorks Customer Lookup 4'[MaritalStatus] = "M"  
4     &&  
5     'AdventureWorks Customer Lookup 4'[TotalChildren]>=1  
6     &&  
7     'AdventureWorks Customer Lookup 4'[AnnualIncome] > 100000,  
8     "Priority",  
9     "Standard"  
10 )
```

Customer Priority	CustomerKey
Priority	11081
Priority	11177
Priority	11179
Priority	11180
Priority	11181
Priority	11239
Priority	11240
Priority	11242
Priority	11243
Priority	11245
Priority	11248
Priority	11249
Priority	11250
Priority	11258
Priority	11260
Priority	11261
Priority	11268
Priority	11269
Priority	11270
Priority	11283
Priority	11284
Priority	11285
Priority	11288
Priority	11289
Priority	11290
Priority	11291

Create a calculated column in the Customer Lookup table named Customer income:

- If annual income is >= \$150,000, Very High
- If annual income is >= \$100,000, High
- If annual income is >= \$50,000, Average
- Otherwise, Income Level = Low

```

1 Customer Income =
2 SWITCH(
3     TRUE(),
4     'AdventureWorks Customer Lookup 4'[AnnualIncome]>= 150000, "Very High",
5     'AdventureWorks Customer Lookup 4'[AnnualIncome]>= 100000, "High",
6     'AdventureWorks Customer Lookup 4'[AnnualIncome] >= 50000, "Average",
7     "Low"
8 )

```

Customer Income	CustomerKey
Very High	11079
Very High	11080
Very High	11180
Very High	11181
Very High	11240
Very High	11243
Very High	11244
Very High	11250
Very High	11271
Very High	11286
Very High	11292
Very High	11419
Very High	11422
Very High	11434
Very High	11436
Very High	11466
Very High	11467

Very High	12126
Very High	12134
Very High	12163
Very High	12164
Very High	12174
Very High	12190

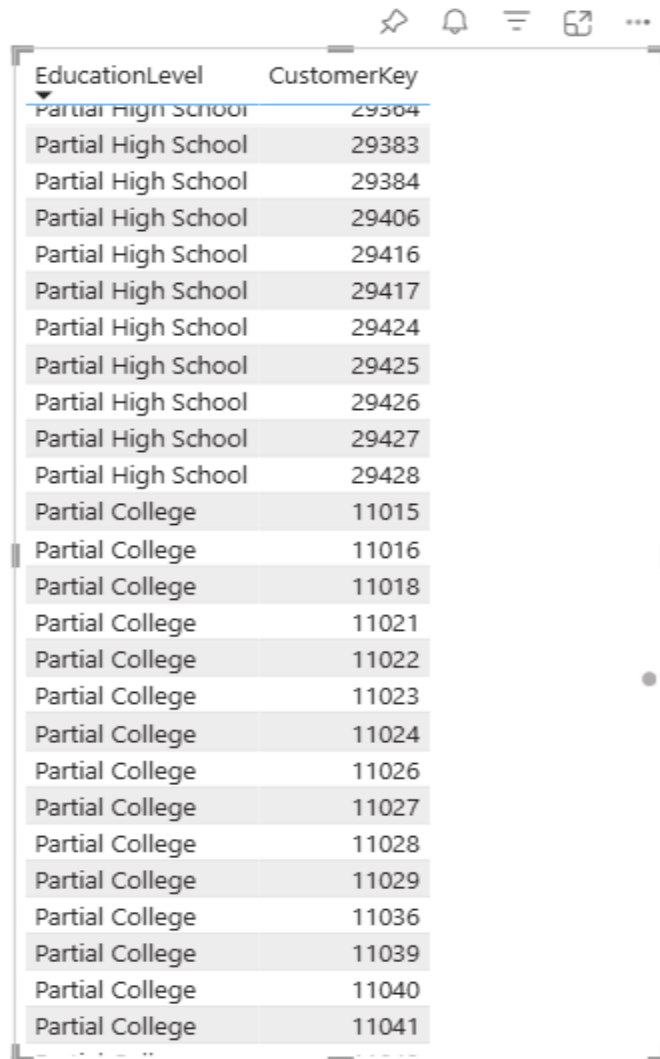

Use a SWITCH function* to create another column named Education Category:

- If Education Level is High School or Partial High School, Education Category = High School

○ If Education Level is Bachelors or Partial College, Education Category = Undergrad

○ If Education Level is Graduate Degree, Education Category = Graduate

```
1 Education Category =  
2 SWITCH(  
3     'AdventureWorks Customer Lookup 4'[EducationLevel],  
4     "High School", "High School",  
5     "Partial High School", "High School",  
6     "Bachelors", "Undergrad",  
7     "Partial College", "Undergrad",  
8     "Graduate Degree", "Graduate"  
9 )
```

A screenshot of a data table with two columns: EducationLevel and CustomerKey. The table is displayed in a window with standard UI icons at the top. The data is as follows:

EducationLevel	CustomerKey
Partial High School	29384
Partial High School	29383
Partial High School	29384
Partial High School	29406
Partial High School	29416
Partial High School	29417
Partial High School	29424
Partial High School	29425
Partial High School	29426
Partial High School	29427
Partial High School	29428
